SITE LOG

SITE DESCRIPTION AND HISTORY:

Walsh and Associates is a warehousing operation in a commercial residential area. The site was allegedly sprayed by Bliss Waste Oil in the early 1970's. At the time of spraying, the property was occupied by Sherwood Medical Industries, and one of the employees, Tom Shuman, witnessed the spraying. Mr. Shuman claims to have seen a sign reading "Bliss Waste Oil Hauling" on the truck spraying the oil. The only area sprayed was the gravel drive near the back of the warehouse. The drive runs for roughly 350 feet.
